

All the latest local & international spill control news....

WELCOME NEW MEMBERS !

We extend a very warm welcome to the following four (4) new AA members:

Ecospill

Enware Australia

Spill Ready

Opec Systems

We appreciate your joining with us to help the Association achieve our policy goals and build the Spill Control Industry for the benefit of all legitimate participants.

We expect that at least another two (2) companies will join in early 2014, taking out membership base to eleven (11) companies nationwide.

A Message from the Chairman.....

AusSpill Association is pleased to announce the launch of its industry newsletter - the *AusSpill Association News (AAN)* - in early 2014.

We plan to use this publication to keep our members, the wider spill control industry & regulators nationally, up to date on industry developments locally & globally.

Importantly, this publication will mean that AA members & their clients will have an on-going forum for their views, so we urge members to send us any information you think will interest our target audience.

In keeping with its charter, AAN will be focussing on product agnostic industry issues affecting the spill control sector, so no matter how small or large the issue, please send it in.

Latest Developments

We look forward to reporting soon on the progress of AA's two (2) technical sub-committees which have begun work on standards for absorbents and spill kits – both AA key objectives. The sub-committees' deliberations will form the basis for input from all AA members.

Also, I believe the scheduled revision in 2014 of Australian Standard AS1940-2004, will have a tremendous potential impact on our industry, and AA members' input will be sought early in the year.

May I take this opportunity to wish all members the very best for the coming Christmas and Festive Season and trust all will have a restful break.

Best wishes

Trevor Prentice
